

Marketplace™

Extend the Value of Your Laserfiche® System

- Find Out-of-the-Box Integrations and Customizations
- Add New Functionality to Your Laserfiche Solution
- Maximize the Return on Your Laserfiche Investment

Through our Professional Developer Partnership™, we provide independent software developers with resources that help them integrate Laserfiche® with third-party applications and customize system functionality. On the Laserfiche Marketplace™, you'll find detailed information about these integrations and customizations—and learn how they'll help maximize your system's value.

Automate Processes and Simplify Daily Tasks

The Marketplace features solutions designed to meet a variety of business needs. For example, you'll find packaged integrations that enable you to access Laserfiche documents from other mission-critical systems, including GIS, property management and legislative management applications. You'll also find solutions that help you automate everyday tasks, from creating electronic folder structures to backing up your repository using optical storage media.

Other solutions add new functionality to your Laserfiche system. For example, organizations that process handwritten documents will benefit from digital pen and paper technology, which digitizes handwritten text and makes it available for searching. Organizations that work with numerous forms will appreciate a solution that enables staff to quickly design, process, fill out and index forms prior to sending them to the Laserfiche repository. And every organization will benefit from a digital signature solution that enables users to quickly and securely sign and date-stamp documents and records.

Find Detailed information About Third-Party Solutions

The Marketplace includes in-depth information about each solution listed, including a product description and key features. You'll also find pricing, purchasing and support information, as well as a list of the Laserfiche versions the solution's compatible with. Perhaps most importantly, you'll find links to resources that provide you with more specific details about the solution, from data-sheets and PowerPoint® presentations to video tutorials and Webinars.

To help our development partners better gauge our users' needs, the Marketplace also enables you to request new integrations.

Marketplace Highlights

- Add new functionality to your Laserfiche system using integrations and customizations created by our development partners.
- Extend your system's capabilities and solve a variety of business problems.
- Find detailed information about each solution, including pricing and support information.
- Submit requests for new integrations.
